

1208 CONCRETE HOPPER

1209 HOPPER CHUTE SECTIONS

The 1208 heavy duty concrete hopper is designed for use where the access of a concrete skip is not practical.

The hopper is available in 2 different sizes and various outlet diameters, see the below table for further details.

The 1208 is designed for use in line with the 1209 metal chute sections.

The 1209 heavy duty concrete hopper chute section is designed for use where the access of a concrete skip is not practical. Attached to the top hopper by “hook and chain” these sections create a flexible method of getting concrete to where it’s needed without the need for a concrete skip

The 1209 sections are designed for use in line with the 1208 hopper.

Product Code	Length (mm)	Width (mm)	Weight (kg)
